Education

Manipal University, Jaipur — **Jaipur, Rajasthan**
Bachelor of Technology in Computer Science and Engineering | Current CGPA: 7.63 (till 5 semesters) — 2023 - 2027

Maa Saraswati Academy School — **Zirapur, Madhya Pradesh**
Grade 12 | Percentage: 90.4 — 2020 - 2022

Vijaya Convent High School — **Zirapur , Madhya Pradesh**
Grade 10 | Percentage: 94.25 — 2018 - 2020

Experience

Summer Intern - India Space Lab (Remote) — **May 2026 - Present**
Currently participating in the India Space Lab Summer Internship & Technical Training Program with esposure to emerging technologies including Remote Sensing, and GIS. Working on technical training modules and project-based learning focused on space and engineering applications.

Machine Learning Intern Prodigy InfoTech (Remote) — **May 2026 – Present**
Working on machine learning and computer vision projects using Python, Scikit-learn, OpenCV, and Pandas.
Projects: SVM-based Cats vs Dogs Image Classification, Hand Gesture Recognition System

Projects

ACE Interview Generative AI-Powered Interview Preparation Platform — GitHub
Tech Stack: React.js, Node.js, Express.js, MongoDB, Mongoose, Google Gemini API, JWT, Puppeteer, Multer, PDF-Parse, REST APIs

Developed a full-stack Generative AI-powered interview preparation platform that analyzes resumes, compares them with job descriptions, identifies skill gaps, generates personalized interview questions, and creates tailored preparation roadmaps.

- Integrated Google Gemini API to automate resume analysis, job description matching, skill gap identification, and generation of technical and behavioral interview questions.
- Built secure and scalable RESTful APIs using Node.js, Express.js, MongoDB, and Mongoose with JWT-based authentication, protected routes, and user-specific report access.
- Implemented resume parsing, file upload, and automated PDF generation using PDF-Parse, Multer, and Puppeteer to create tailored resumes aligned with target job roles.
- Designed and deployed a responsive full-stack application using React.js, SCSS, Axios, Vercel, and Render, enabling seamless user experience and cloud-based deployment.

Uni Lost Campus Lost and Found Portal — GitHub
Tech Stack: MongoDB, Express.js, Node.js, JavaScript, HTML, CSS, JWT, REST API

Developed a full-stack lost and found management system for campuses with secure authentication, cloud database integration, and real-time item tracking.

- Built scalable backend services using Node.js and Express.js with JWT-based authentication and RESTFul APIs.
- Implemented CRUD operations and MongoDB Atlas integration for secure and efficient data management.
- Designed responsive frontend interfaces for item reporting, claim requests, and user dashboard management.
- Deployed the application using Render and GitHub Pages with secure API communication and cloud hosting.

Skills

Languages:	C, Java, JavaScript, Python
Core Concepts:	Data Structures, Algorithms, OOP, DBMS, Computer Networks
Web Development:	HTML, CSS, JavaScript, Node.js, Express.js, RESTFul APIs
Databases & Cloud:	MongoDB Atlas, MySQL, Render, GitHub Pages
ML & Libraries:	Pandas, NumPy, Scikit-learn, XGBoost, Streamlit
Tools & Platforms:	Git, GitHub, GitHub Copilot, Unix/Linux

Certifications

Data Structure and Algorithms using Java — **NPTEL**
Completed a 12-week course covering core data structures, algorithm design, and problem-solving using Java. — 2024

Database Foundation — **Oracle Academy**
Gained practical understanding of relational databases, SQL queries, and database design concepts. — 2024

Introduction to LLMs and Hugging Face — **Coursera**
Learned fundamentals of Large Language Models, Hugging Face transformers, and practical AI application workflows. 2026

Version Control with Git and GitHub — **Coursera**
Learned Git workflows, branching, and collaborative development on GitHub. — Mar 2026
